3610x1710x1900

Details

Frame-mounted, compact, fully equipped decontamination system for vehicles, material, persons, equipments and streets. Specially equipped for the application of the new developed decontamination solution GDS 2000. Due to the 1000l tank an independent operation is possible. The dimensions of the CDS 1000 GDS is adequate for standard trailer and trucks (i.e. RDS 2000 and RM 35 for A and B decontamination or GDS 2000 for C decontamination of ground and RM 21 for persons) and can be set up in 30 minutes. Applicable for hot and cold climate zones.
