

FIELD BAKERY 500 HJ

Mobile, trailer-mounted bakery. Sturdy and mobile bakery

Benefits

- Mounted on an all-terrain, single-axle trailer
- Supplies up to 1044 persons with 600 grams of bread per day
- Integrated, diesel-fueled power generator (ensures stand-alone operation)
- Compact construction, simplified setup

General description

The 500 HJ trailer-mounted field bakery makes it possible to bake bread in field conditions. It is ideally suited for all the necessary production processes - kneading, weighing, proving (with a raising agent), baking and cooling - and was specially developed to cater for the bread requirements of soldiers in the field. Thus it can supply up to 1044 persons with a bread ration of 600 grams per head within 16 hours. An integrated, diesel-fueled power generator makes the system fully independent from an external power source, thereby enabling it to operate as a stand-alone unit without recourse to fixed infrastructures. The field bakery is mounted on a single-axle trailer and is equipped with an inertia brake and a semi-automatic, weatherproof tarpaulin. Its compact construction enables speedy commissioning.

Technical data

Dimensions (L x W x H) mm (Transport)	approx. 3730x2300x2560
Dimensions (L x W x H) mm (Operation)	approx. 6775x4500x2560
Weight (tons)	3,5
Output	approx. 624 kg bread/day
