

RAPID RESPONSE KITCHEN KRR 50 E

Modern Meal Ready to Eat

Benefits

- Simple and fast set-up
- Minimal space requirement during transportation. Maximum working surface
- Individual capacity for expandability and diverse cooking possibilities
- Easy to transport without extra tools

General description

Futuretech designed the electrically operated Rapid Response Kitchen specifically for scenarios involving little or no existing infrastructure. Packaged in three functional units (basic system) for space saving integration, the Rapid Response Kitchen can be transported to any location and set up within a minimum delay, for instance in a tent or existing building. The basic system is conformed by four units: cooking, combi steamer, water and warm water supply. The KRR 50 E can be used to prepare varied menus for up to 50 personnel, or simple meals for up to 75 personnel. This ensures fast, high-quality catering even where no permanent infrastructure is in place, and using only minimal manpower. The KRR 50 E can be used as a stand-alone cooking line, or for extending existing catering systems, e.g. for use as a serving line.

Technical data

Operating dimensions (L x W x H)	approx. 4,800 x 600 x 915 mm
Transport dimensions (L x W x H)	approx. 800 x 600 x 915 mm
Total weight	approx. 218 kg
Menus: Simple dishes:	up to 50 up to 75

FUTURETECH

Kärcher Group

1 Functional Box Warm Water Supply

Completes the KRR 50 by an autarkic warm water supply with two heaters for 30 liters of hot water up to 80°C. Two mobile hot water heater, an additional hand washbasin, a hygiene board and a working table are included as well.
Dimensions: 800 x 600 x 915mm (L x W x H)
Art. No.: 1.954-004.0

2 Functional Box Cooking Induction

Extends the cooking capacity by additional two high performance induction fields. The functional box includes a working table, two GN 1/1 induction containers for cooking, one perforated GN 1/1 container and two cutting boards.
Dimensions: 800 x 600 x 915 mm (L x W x H)
Art. No.: 1.954-005.0

3 Additional table

Additional stable, stainless steel table, gradually adjustable (from 645 mm to 915 mm) in height can be stored in the functional box in addition to the one table already included in the scope of delivery.
Dimensions: 800 x 600 x 915 mm (L x W x H)
Art. No.: 2.860-271.0

4 Table bottom storage shelf, stainless steel

Provides additional storage space for cooking accessories, food and containers during cooking, stored in the table plate.
Dimensions: 750 x 380 x 20 mm (L x W x H)
Art. No.: 2.860-275.00

5 Lockable double door

To protect against the ingress of dirt and small animals or as lockable storage space (lock not included), replaces a side wall.
Dimensions: 790 x 600 x 20 mm (L x W x H)
Art. No.: 2.860-274.0

6 Additional Shelves

Stable shelves for optimal use of the empty functional boxes as storage space for small kitchen utensils. Due to the innovative clip-on technique the shelves can be fitted and removed within seconds without using any tools.
Dimensions: 730 x 430 x 20 mm (L x W x H)
Art. No.: 4.035-543.0

7 Protection cover, fiber - reinforced

To protect the module from dirt, climatic conditions, being scratched during transport or from freight stickers on the stainless steel surfaces. Anti-slip foil with cut-outs for handles.
Art. No.: 6.667-525.0

8 Hygiene board

Towel distributor for foldable and paper towels, easy to be attached to the bottom side of a KRR 50 table as well as soap and disinfectant dispenser easy to be attached to the KRR 50 washbasin.
Art. No. Towel distributor: 4.391-004.0
Art. No. Soap dispenser: 4.391-003.0

9 Cooking utensil set

High quality, 24-piece cooking utensil set (e.g. set of knives, scoop, bowls, sieve).
Art. No.: 2.860-272.0
